Room and terrace

Interior dimensions · HVAC and telecom equipment

Synthetic cutaway: roof and parts of the foreground walls removed.

Room length	Room depth	Equipment gap
6.00 m	4.80 m	1.20 m

Survey scope

A 6.00 x 4.80 m room opening onto a terrace, with a twin-fan HVAC unit beside a telecom antenna. Reference room height: 3.00 m. Floor area: 28.80 m².

Source and measurement basis

Original synthetic RGB cloud: 39,581 points; metres, Z up.
Room: X = -6.00 to 0.00; Y = -2.40 to +2.40; inside wall faces.
Equipment gap: X = 2.65 to 3.85; HVAC casing to the antenna base.
This is geometric spacing, not a verified installation or service clearance.

Values use known reference geometry, not a fit to noisy scan points.

Illustrative sample; not a live AI output or an accuracy benchmark.
